SAGAR NINAVE

(+91) 9657445206 | sagarninave@gmail.com | LinkedIn | GitHub

Skills

User Interface: HTML5, CSS, Material-UI, Ant Design, Tailwind CSS, Figma.
Frontend: JavaScript, TypeScript, ReactJS, NextJS, Redux Toolkit, Zustand, Jotai, ReactDOM.
Backend: Node.js, Nest.js, Express.js, MongoDB, Redis, WebSocket.
Testing: BrowserStack, Jest, Playwright, React Testing Library, and Cypress.
Technologies: Git, Linux Scripting, Docker, Kubernetes, AWS, Jenkins, Husky, ESLint, Prettier, Jira.

Experience

Amla Commerce — *Software Engineer,* ***Jan 2024 – Present***

- Developed and maintained responsive, accessible, and scalable web applications using ReactJS, Next.js, and TypeScript, improving front-end performance by 25% and cross-device consistency by 30%.
- Converted 50+ Figma wire-frames into pixel-perfect, interactive interfaces using Ant Design, Material-UI, and Tailwind CSS, ensuring WCAG 2.1 accessibility compliance.
- Collaborated with back-end, QA, and design teams to deliver high-quality user experiences, resulting in a 30% improvement in user satisfaction metrics based on internal feedback loops.
- Managed version control and CI/CD pipelines via Git, Docker, Kubernetes, and Jenkins, accelerating deployment cycles by 40% and reducing downtime during releases.
- Worked with micro-frontend architecture to modularize large applications, improving maintainability and performance.

Konverge AI Pvt. Ltd. — *Senior Software Engineer,* ***Sept 2020 – Jan 2024***

- Enforced code quality through Husky pre-commit hooks, ESLint, and Prettier, cutting code review revisions by 25% and ensuring consistent development practices.
- Built real-time communication features (e.g., live notifications, chat) using WebSockets/Socket.io, reducing latency by over 35% compared to traditional polling.
- Managed data flow and caching using MongoDB and Redis, improving database query efficiency by up to 40% and reducing load on primary systems.
- Implemented OAuth and JWT-based authentication for role-based access control for secure routing and request handling.

Smart Data Enterprises (I) Ltd. — *Associate Software Engineer* ***Jul 2019 – Feb 2020***

- Ensured application stability through automated testing pipelines with Jest, Playwright, Cypress, and React Testing Library, achieving over 85% test coverage across critical modules and reducing response times by 20%.
- Designed and integrated RESTful APIs using Node.js, Express.js, and Nest.js, enhancing API response times by 20–30% through optimized request handling.
- Delivered projects in an Agile environment using Jira, continuously collaborating with cross-functional teams, adapting to changing requirements, and customer-focused releases, resulting in a 20% improvement in sprint completion rates.
- Deployed and monitored scalable systems on AWS, maintaining 99.9% uptime and efficient resource utilization, and established robust logging and monitoring with Winston to maintain high system reliability.

Education

Master of Computer Application ***Aug 2016 – Jun 2019***
Shri Ramdeobaba College of Engineering and Management

Projects

KnoxBox | My Locker 360 | Quotimus Prime | NeeWee | Strategy Connect | Quality Count

Certification: Namaste React | Namaste Node | Namaste DSA
